NATURAL SOURCE OF VEGETABLES , MINERALS & HERBS

- Phospholipids Are Made Up Of Two Fatty Acids That Are Attached To A Glycerol "head". The Glycerol Head Region Of The Molecule Attracts Water (known As Hydrophilic) And The Fatty Tail Acid End Repels Water (hydrophobic). The Hydrophilic (water Loving) Head Attaches To The Stomach Lining, Leaving The Hydrophobic End (water Repelling) Exposed To The Lumen Of The Stomach. This Arrangement Helps Form A Barrier Between The Stomach Wall And The Gastric Contents And Helps To Repel Water Loving Substances Such As Gastric Acid Away From The Stomach Wall, Thereby Providing Protection To The Sensitive Mucosa.

- In Addition To Of Fering Gastrointestinal Protection, TONITO A-FEED Is Recognized For Boosting The Health Of All Cell Membranes, Including Those Of Skin, Hair, And Hooves.
