

REO

Complete Care Cream

INTRODUCTION

Tonito REO cream is a broad term used to describe a range of products containing antifungal agents that are topically applied to the Pet & Zoo Animals skin to control and manage fungal infections. Tonito REO may be formulated with a moisture barrier to protect and condition the skin.

MECHANISMS OF ACTION

Tonito REO creams work by either killing or slowing the growth of fungal or bacterial cells. Topical fungus infections like ringworm may clear up after using an REO for 2-4 weeks.

INACTIVE INGREDIENTS

Neem oil, Vitamin A, Vitamin D, Vitamin E, Excipients.

DIRECTIONS FOR USE

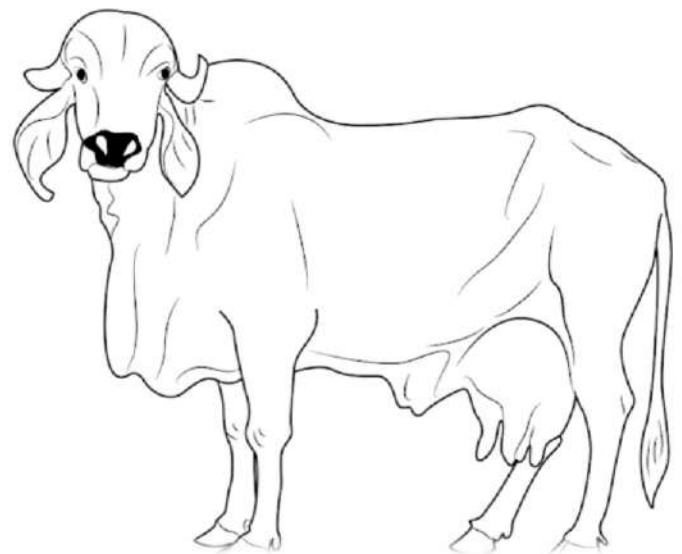

Cleanse all wounds or intended areas of application thoroughly with a mild soap and water. If necessary, clip or shave hair from around the wound area. Cover the affected and surrounding areas with REO and bandage lightly if possible with several layers of gauze. Apply several times daily for best results. Best for Pet Animals & Zoo Animals.

KEY BENEFITS
